

## Join the GEO Morphix Team

We are professional earth scientists specializing in geomorphology and earth surface processes. GEO Morphix Ltd. focuses on river and shoreline restoration, erosion hazard delineation and mitigation, and projects that require an in-depth understanding of erosion, sedimentation and sediment transport. Our team of industry leaders provide observation-rich answers based on a balanced application of quality science and years of experience to achieve practical, implementable, and acceptable solutions for all stakeholders. A successful project is one that meets or exceeds our client's objectives. GEO Morphix has a rapidly growing list of both public and private sector clients. We are currently looking to find an Intermediate Geoscientist/Geomorphologist to join our young and dynamic team. Being part of the GEO Morphix team provides an opportunity to learn, connect your academic studies to your career, and make a positive impact on the environment.

While most of our team members are concentrated in southern Ontario, our hybrid office approach offers flexibility for staff working from home and extends our geographic presence across the market. GEO Morphix implements a range of technology to maintain effective and collaborative workspaces across virtual environments, which limits the environmental and social effects of commuting, and ensures the productivity and success of our employees.

## POSITION DESCRIPTION

### Intermediate Geoscientist/Geomorphologist

We are currently looking for an Intermediate Geoscientist/Geomorphologist to join our dynamic team. The incumbent would work closely with senior staff on a range of geoscience projects including geomorphological assessments, restoration design, and erosion and hazard assessments. Successful candidates will have excellent inter-personal skills and must be outcome-oriented.

#### *Responsibilities & Requirements*

- Ability to lead field teams
- Provide technical support to senior staff with regards to data analysis and report preparation
- Support mentoring and training of junior staff, and work with senior staff to expand field techniques and practices
- Ability to manage multiple projects with accuracy
- Exceptional inter-personal skills to work with our staff, clients, consulting partners, and permitting agencies

#### *Qualifications*

- Experience in field data collection
- Organized and strong problem solving and critical thinking skills
- Ability to manage multiple tasks and achieve deadlines under pressure
- Experience with aerial photographic interpretation and map analysis
- Excellent written and verbal communication skills
- Degree (Master's degree preferred) in Environmental Science, Geomorphology, Physical Geography or Engineering
- Licenced as a certified professional by the Association of Professional Geoscientists of Ontario (APGO) would be considered an asset
- Minimum five years of related experience
- Demonstrated knowledge of relevant provincial and federal environmental regulations and guidelines
- Valid G Class driver's license

GEO Morphix understands the importance of employee well-being and job satisfaction. Productive and energized staff are the key to a successful company. In support of this goal GEO Morphix offers:

- A friendly and accepting work atmosphere. We are committed to workplace diversity, inclusion, and equal opportunity, and recognize the associated benefits of different perspectives.
- A competitive compensation package including comprehensive benefits
- The opportunity to participate in an employer sponsored Group Registered Retirement Savings Plan
- The opportunity to participate in a performance-based bonus program
- Fitness/Recreation wellness benefit
- Employee training and development initiatives and support for career advancement (through financial assistance and flexible scheduling)
